

S40i

Tablet, Laptop & Chromebook Charge Cart

When it comes to children, it's always "safety first." S40i features a fully-welded steel frame with smooth, rounded plastic covers, ensuring a safe learning environment without sacrificing superior structural integrity. You can store, secure and charge up to 40 tablets, laptops and Chromebooks under 14". And its intelligent charging system plus straightforward cable management make it an ideal choice for satisfying any charging needs.

Round and sound

The cart's steel frame is welded into a complete metal skeleton (no screws!), after which the seams are smoothed to a round finish and covered in protective, eco-friendly plastic, leaving no exposed corners or sharp edges. The hinges on the steel double doors are cleverly placed on the inside of the doors to protect students from potentially serious bodily harm.

Larger space, easier storage

S40i's wide storage slots are designed to fit a variety of Chromebooks, laptops and tablets. The slim and sturdy metal dividers and pull-out drawers allow easy storage and removal of mobile devices; power adapters are stored in individual compartments for added convenience, while the repositionable cable clips keep power cables neat and organized.

Charge fast. Charge safe.

S40i's intelligent charging mechanism dynamically monitors each of the four charging zones to allocate electrical current to the devices that need it most. What's more, teachers and technology specialists can sleep soundly knowing S40i is protected by the industry's only 5-year standard warranty for electrical components.

Secure your investment

The robust, fully-welded steel frame, steel double doors and three-point locking mechanisms found on both the front and rear doors of S40i make breaking into the cart a daunting task for any would-be thief. This level of security offers you something precious that money can't buy: peace of mind.

Take a load off

Decades of experience in education has taught us to appreciate the toll teaching takes on the body. With pull-out drawers, ergonomic handles, 4 AC auxiliary outlets, painless cable management and remarkably quiet 5" medical-grade casters, S40i goes a long way to take the physical discomfort out of device management.
