***Watch Movies via DVD-ROM &
Play PC Games on TV***

- Dual display on VGA and TV Monitors
- Supports resolution up to 1280 x 1024 with 16.7 million colors
- SIX-LINE buffer technology for sharp and flicker-free TV display

The bigger

the screen the better !

Play with your friends and view the action in wide screen format. Visuals are better and sharper thanks to the SIX-LINE buffer technology for sharp, flicker-free TV display with resolutions of up to 1280 x 1024 and in 16 million glorious colors!

Watch your DVD movies come alive in a large screen TV. Now instead of crowding around your computer you can sit back and relax with your family and watch your favorite DVD movies.

Here's a way to turn those games of yours into a feast for your eyes! Record your games to your VCR and have a souvenir and review what moves your opponent used against you. With the AVerKey100 Pro, You're the master gamer!

Get your ideas across more effectively by giving your clients the big picture. In displaying your presentation on TV, you need not worry if they have a projector or not. The great thing is that the TV is so common that nearly all your clients can feel comfortable with your presentation, when viewed on TV.
